## SINTRIX® TECHNOLOGY: IT'S THE SMALL THINGS THAT MAKE A BIG DIFFERENCE.

Microscopic silica spheres evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod.

Never has that statement held more truth than with the development of SINTRIX® technology.

All carbon rods utilise carbon fibres that are bonded together by an adhesive resin. The resin material used in SINTRIX® is produced by 3M®, it is a unique and patented material incorporating silica nano spheres which provides two distinct benefits.

Firstly the microscopic silica spheres are able to evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod. Secondly, being spherical, the silica particles are able to resist pressure and compression from any angle. This is particularly important because it is under compression forces, on the underside of a bent rod, rather than tension forces, on the outside of the curve, that carbon fibre is most likely to weaken and potentially break. So by resisting compression better, SINTRIX® rods are stronger.

In developing SINTRIX® our specialist composite engineers and rod designers spent over two years experimenting with different types, and mixes, of carbon fibres combined with varying levels of 3M® nano silica resin. They also discovered that the normal manufacturing processes associated with carbon fibre rods had to be significantly changed in order to get the best from the new 3M® resin material. The final results were astonishing with up to 60% increases in strength and up to 30% savings in weight.

Driven by our passion and determination to always push the boundaries—part of Hardy's DNA since 1872—we offer varying levels of SINTRIX® technology across our rod range, each level brings significant and tangible benefits over traditional carbon fibre construction.

## SINTRIX®: THE SUCCESS STORY.

When I received the first prototype blanks rolled from SINTRIX® material in late 2009 I was shocked. I've held and flexed literally thousands of rod blanks over the years, and when I held the 9ft #10 saltwater rod, I was immediately taken aback at the lack of weight for a #10 – it just instantly felt 'right'.

Our early work on the material with our sister company Hardy Advanced Composites had indicated considerable increases in compressive strength and impact resistance where possible, but even our material engineers were not prepared for the results. Following the first day of testing, we even asked the manufacturer of our compressive strength tester to re-calibrate the machine as the results it had produced were, to quote one of our testers, "nonsense".

There was nothing wrong with the testing machine, the blanks netted out at close to 60% stronger than our calculations suggested they ought to be, and from that point on the entire team focused on the development of what became the Zenith and Proaxis series of rods and the refinement of what was to become SINTRIX® technology.

I could tell you about the testing trips to the Florida Keys fishing for sharks with medium-weight Trout rods, or the actual fist fight that took place on the dockside between two guides over a test rod, but I think some of these quotes from icons and pioneers in the sport tell the impact that SINTRIX® actually made far better than I could.

**Howard Croston, Hardy Product Manager and England International.**

## THE EVOLUTION OF SINTRIX®

All Hardy rods now feature our industry renowned SINTRIX® technology in one of 5 distinct performance enhancing variations.

Significant increase in compressive strength over traditional carbon fibre.

Shadow

p29

Up to 30% increase in compressive strength over traditional carbon fibre.

Demon

p22-27

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre.

Zane

p21

Zephyrus

p17

Zane Pro

p18

SINTRIX based technology combined with a secondary nano loaded material that retains the core properties of SINTRIX 440 whilst enhancing the feel, recovery and in-hand balance of the blank without relying on an increase in stiffer high modulus material. SINTRIX NSX delivers true user-friendly high performance.

Ultralite & Ultralite LL

p12-15

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre, with an increase in GPA (stiffness) of up to 15% over SINTRIX® 440.

Wraith

p11

# FRESHWATER, ALL WATER AND SALTWATER

## Tactical and Extreme

A number of Hardy rods within our series feature T or E designations.

T designated rods are designed with highly tactical situations in mind where a careful combination of line feel, recovery and carefully calibrated blank stiffness are required to meet specific challenges.

Rods designated with an E are typically more at the 'extreme' end of the scale where ultra-fast actions and high recovery are specifically required.

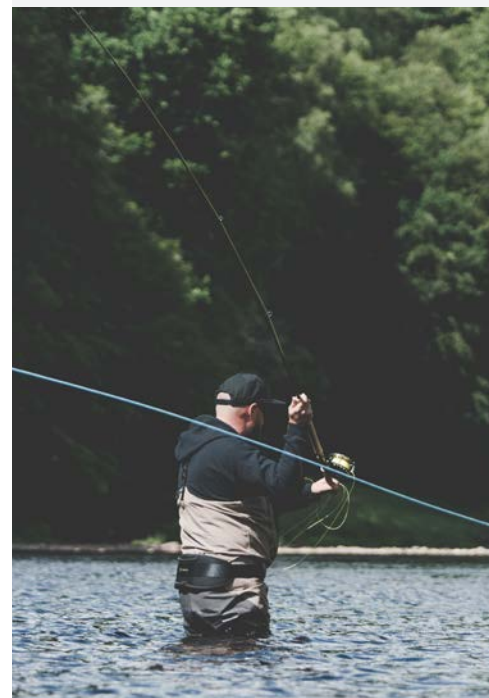

## Freshwater (FWS)

FWS or "Freshwater series" rods feature selected wood spacers, refined handle designs and carefully selected hardware offering the optimum blend of lightness and durability.

## All water (AWS)

AWS or "All water series" rods are designed to bridge the gap between light, freshwater and heavy saltwater applications, featuring saltwater safe hardware and fittings, including carbon or aluminium reel seat inserts, larger guides and more powerful actions.

## Saltwater (SWS)

SWS or "Saltwater series" rods are true hardcore saltwater rods, designed to meet the challenges of the saltwater environment head on. The rods feature heavy duty fixtures and fittings including extra large guides, heavy duty salt safe reel seats and enlarged fighting butts.

## Wraith

Trophy Brown Trout hugging the structure tight to a distant river bank, Rainbows smashing fry on the ripple line in a vast mountain lake, Sea Trout crashing in the void of the darkest summer nights. Adrenaline fuelled moments that require an adrenaline fuelled fly rod. Wraith with SINTRIX® 550 technology generates incredible line speed and unprecedented tip recovery for the longest of casts, yet retains a degree of line control and feel that is almost impossible to translate into words. Load one up and hold on.

- ☞ Supplied in a custom aluminium tube with engraved metal end caps

## Ultralite

The all new Ultralite range of fly rods features SINTRIX NSX. SINTRIX NSX is based on our industry changing SINTRIX technology but now combined with a secondary classified additive that allows much lower prepreg weights to be achieved. This lighter weight material allows targeted modification of the blank design without affecting the blank's strength. The net result is lighter, more responsive blanks that allow the angler to "feel" the line more during the casting stroke giving a greater degree of control than ever before. The reel seat on the Ultralite is a masterpiece of form and function—moving more of the rod's weight percentage behind the hand gives incredible in-hand balance, single start threads resist the reel loosening under heavy use and a keyed body further ensure a snug fit for your reel.

## Ultralite LL

Never before have light line and river specific anglers had so many advanced techniques to choose from. The surge in popularity around advanced European style and competition style techniques has, to some degree, left rod design behind—not any more. These technique specific rods have been designed, developed and tested by some of the leading exponents of modern light line methods to represent the most refined and usable actions on the market for these demanding styles of fishing.

# Zane Pro

The Saltwater game changer 2.0. So why redesign possibly the greatest saltwater fly rod ever built?

Why reduce the shaft diameter on selected sizes for better wind penetration and reduced weight? Why redesign the mandrels and pattern layups to squeeze every last drop of performance out of the aerospace grade carbon fibre and advanced SINTRIX 440 resin system? Why upgrade the guides to the latest generation in ceramic lined titanium recoils? Why upgrade to a single start scratch resistant hard anodised reel seat?

The simple answer is why not.

- ✓ SINTRIX® 330 blank construction in 6 section configuration
- ✓ Medium fast action with high recovery
- ✓ AmTac Ti guides
- ✓ Built-in hook keeper
- ✓ Supplied in a custom aluminium tube with engraved metal end caps

from 48.7cm to 83.5cm

**Well travelled.** The 6 piece smuggler configuration fits neatly in the compact aluminium tube.

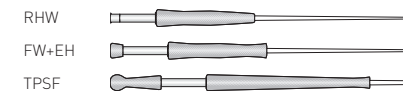

# Shadow

Hardy Shadow brings a new level of technology and value into the Hardy brand. SINTRIX® 220 is the stepping stone into the industry leading SINTRIX® technology platform. Hardy Shadow features an easy loading yet sharp recovering blank design that gives easy access to user-friendly high performance. All Shadow rods feature high quality hardware and a modern cosmetic design that reflects the finest Hardy build quality.

- ☞ SINTRIX® 220 blank construction
- ☞ High quality hardware
- ☞ Easy loading yet sharp recovery blank design
- ☞ Bar stock 6061 aluminium reel seat
- ☞ Supplied in a custom, hard tube

## A TRADITION OF EXCELLENCE

Hardy has been hand-crafting reels in Alnwick for over 120 years, a record that no other tackle manufacturer can ever hope to match. Tradition is baked into our DNA but it can only exist in partnership with the constant quest to refine our designs. More than anything else, it is innovation that lies at the heart of the ethos that drives our engineers in a constant search to improve our tackle—without the unique chemistry that binds them and our time-served craftsmen together, reels like the modern Perfect or the Cascapedia could never have been developed.

## Cascapedia

Available in a full 4 size range covering every fresh water application from Trout to two handed Spey. The new Cascapedia reel is a stunning addition to the Hardy Made in England reel series. The two smaller sizes feature a classic click check system whilst the larger models feature a fully functioning disc drag with an inbuilt audible clicker to give the classic Cascapedia sound.

- Made in Alnwick, England
- Full bar stock construction
- 'S' shaped handle
- Classic click check ratchet sound

## Wide Spool Perfect

Beautiful classic fly reels, the latest revision in over a century of the Perfect. This model features a time proven check system and that classic Perfect sound, hand-crafted in Alnwick, England.

Ever since Forster Hardy was first granted a full patent for the Perfect reel design in 1889, our engineers have been constantly striving for ways to improve on perfection, tweaking and adjusting to bring you what we believe are the best reels in their class to date. After all, if we offered anything less, it would not be a Perfect.

- ✓ Made in Alnwick, England
- ✓ The all time classic fly reel for the discerning traditional fly angler
- ✓ Engineered and hand crafted from bar stock aluminium with a naval brass 1 piece spindle and stainless steel ball bearings
- ✓ Standard arbor design and large line capacity
- ✓ Time proven, adjustable check system with that traditional 'Hardy sound'
- ✓ Deep anodised for strength and durability; smooth gunmetal grey satin finish
- ✓ Easily changed from left to right hand wind
- ✓ Supplied in a soft leather, sheepskin lined reel pouch

## Bouglé

Launched in 2013 to celebrate the reel's 110th birthday, this Bouglé is one of the best yet – with its rolling pillar; reversible click check; naval brass bush and spindle; and its hand polished, deep anodised 'pearl silver' finish. This Bouglé reel is already one of the classics.

Made by time served Hardy Bros. reel makers here in Alnwick, England, this Bouglé reel comes presented in a beautiful, UK made, soft leather, sheepskin lined reel case.

- ⌋ Made in Alnwick, England
- ⌋ A stunning piece of classic design, aesthetics and performance combined
- ⌋ Engineered, hand crafted and polished in bar stock aluminium finished in pearl silver
- ⌋ Traditional standard arbor
- ⌋ Sweet sounding, wide ranging check system
- ⌋ Naval brass bush and spindle
- ⌋ Easily changed from left- to right-hand wind
- ⌋ Spools interchangeable with Bouglé Mk VII, VI, V and IV
- ⌋ Supplied with Hardy Bros. soft leather, sheepskin lined reel pouch

## Zane Carbon

Designed for the flats angler, the Zane Carbon is a lightweight, large arbor, sealed disc drag reel capable of handling anything that's thrown at it. Perfectly at home taming Bonefish or Sea Trout in its smaller sizes to Permit and Tarpon in the 10,000 and 12,000 sizes. The regulated hard indent drag system allows accurate drag settings to be applied quickly in the heat of battle.

- ▮ Bar stock 6061/carbon with non-flash salt-safe anodized finish
- ▮ Fully sealed multi-pad disc drag with 10lb+ stopping power
- ▮ 340 degree regulated drag control with hard indents for fast accurate adjustments

## HBX

Hardy has been hand-crafting reels in Alnwick for over 120 years, a record that no other tackle manufacturer can ever hope to match. The HBX reel combines cutting-edge modern cosmetics and technology with the hand built quality of all of our Made in England reels.

The range caters for both freshwater and saltwater scenarios, from brook Trout to Tarpon and everything in-between.

The HBX reels are low maintenance to allow you to concentrate on what is important. The drag systems are both fully flushable with freshwater, meaning minimal maintenance.

- 🔗 Flushable drag system for minimal maintenance
- 🔗 Saltwater safe
- 🔗 Captive spool release

## Ultralite MTX-S

A bold step forward in reel design, the Ultralite MTX-S is our first fly reel to feature a hybrid carbon fibre / alloy main frame construction with a sealed disc drag system. Strong, light and with a stunning industrial design, the MTX-S features a carbon fiber drag system, 340 degree colour coded regulator, captive spool release and high line capacity.

- Hybrid carbon fibre / alloy main frame design
- Stunning industrial design
- Sealed carbon fibre disc drag system
- Colour coded drag regulator

Ultralite MTX-S employs a **sealed disc drag system** designed to withstand sand, grit and water ingress.

## Ultradisc

A lightweight disc drag reel in its purest form, the all new Ultradisc features everything you need and nothing you don't in a disc drag fly reel.

With an innovative frame design this reel sets a new standard in light weight performance reels whilst allowing the use of ultra thin fly lines and running lines as well as leader-only systems popular in modern river fishing. The scaled multi-pad drag system is also unregulated meaning fine adjustment of the drag pressure over a large window is possible.

- Multi pad scaled disc drag system
- Unregulated drag system for fine adjustments
- Enclosed line guard frame design for use with leader only systems and thin running lines
- The lightest disc drag reel ever produced by Hardy

## Ultraclick

A new standard in ultra light fly reels. The UCL series is our lightest ever fly reel, featuring a fully enclosed line guard for use with ultra thin line designs and leader-only systems. This series of reels is the ultimate for the light line aficionado. Fitted with an adjustable all-metal click system, this is the perfect reel for the lightest of applications.

- A new standard in light weight reel design
- Adjustable all metal clicker system
- Enclosed line guard frame design for use with leader only systems and ultra thin fly lines
- Push off spool release
- The lightest fly reel ever produced by Hardy

## Ultralite ASR

The ultimate cassette system reel, the Hardy Ultralite® ASR (Assisted Spool Release) reel features a fast, easy-to-use spool release system that actively frees the spool at the flick of a switch and automatically engages the new spool with a simple push fit. Also in this range is a lightweight size model specifically designed for the challenges of modern river fishing.

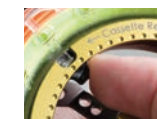

- Bar stock 6061 main construction
- High impact composite spool
- Unique ASR spool system
- Line ID system
- Multi pad, colour-coded 340 degree disc drag
- Heavily ported lightweight design
- Full size range
- Supplied with two additional spare spools and case

Line recommendations are formulated in a grain-weight range format subject to caster experience, fly size & weight, and wind conditions.

Weight recommendations are based off average line length by three styles of casting and do not take into account tip or leader additions.

## PLACING YOUR ORDER

### Pricing

The trade pricing in this catalogue is marked as T-Code and in a format which allows you to use the trade catalogue without consumers recognising the trade price. The first digit of the code is a random letter. The remaining digits represent the actual trade price with the decimal point removed, assuming there two digits after the decimal point. So a T-Code of B2250 would represent a trade price of £22.50.

### Delivery & Carriage

Delivery is normally within 48 hours for UK mainland addresses. Remote locations may take longer.

Orders with a trade value of £150 or more will be delivered carriage free. Orders with a trade value of less than £150 are charged at £7.50 plus VAT.

### Telephone

**01665 602771**

Our Sales Administration Team are available to take your orders between:

8.45 to 16.45 Monday to Thursday  
8.45 to 15.15 on Friday

### Fax

**01665 602389**

Orders can be sent by fax at any time.

### Email

**[pfsalesexp@purefishing.com](mailto:pfsalesexp@purefishing.com)**

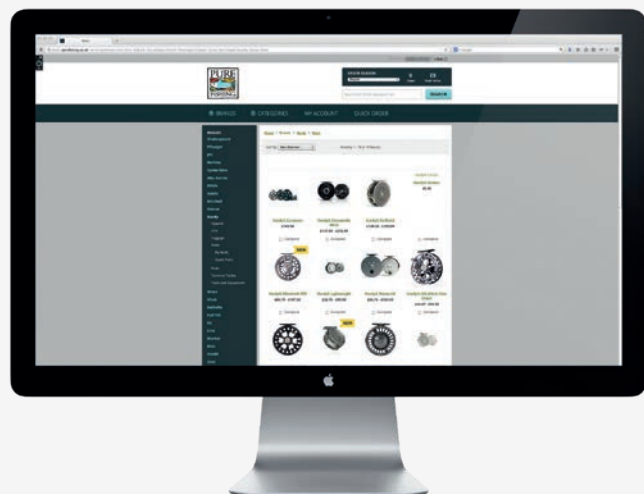

Orders can be sent by email at any time.

### Online Ordering Portal

**<http://eu.purefishingmerchant.com>**

Customers can place orders online, check current stock availability and prices through our online portal, B2B.

For access please email [pfsalesexp@purefishing.com](mailto:pfsalesexp@purefishing.com) or contact your Account Manager.

## ADOBE SCENE 7

### Are you signed up to Scene 7?

**[www.purefishing.com/media-portal](http://www.purefishing.com/media-portal)**

As a Hardy (Pure Fishing) dealer, you can sign up to access Media Portal (also known as Scene 7), which is the Hardy asset library we give access to our dealer network, along with other partners. Once registered with the system you can access it from any computer with internet access. Use Media Portal to find and download product and fishing landscape photography and logos for your project in the correct format. You can also download our catalogues as PDFs.

Individual images can be downloaded in a range of formats using our download wizards, and you can create your own collections or albums and download these as a zip file. Photoshop users can download files using the Scene 7 extension, instructions for which are available upon login under Personal Setup.

We are adding to the collection continuously, so Media Portal is the best place to get up to the minute content to help you sell Hardy products.

For customers requiring access to Media Portal please visit [www.purefishing.com/media-portal](http://www.purefishing.com/media-portal).
