Never has that statement held more truth than with the development of SINTRIX® technology.

All carbon rods utilise carbon fibres that are bonded together by an adhesive resin. The resin material used in SINTRIX® is produced by 3M®, it is a unique and patented material incorporating silica nano spheres which provides two distinct benefits.

Firstly the microscopic silica spheres are able to evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod. Secondly, being spherical, the silica particles are able to resist pressure and compression from any angle. This is particularly important because it is under compression forces, on the underside of a bent rod, rather than tension forces, on the outside of the curve, that carbon fibre is most likely to weaken and potentially break. So by resisting compression better, SINTRIX® rods are stronger.

In developing SINTRIX® our specialist composite engineers and rod designers spent over two years experimenting with different types, and mixes, of carbon fibres combined with varying levels of 3M® nano silica resin. They also discovered that the normal manufacturing processes associated with carbon fibre rods had to be significantly changed in order to get the best from the new 3M® resin material. The final results were astonishing with up to 60% increases in strength and up to 30% savings in weight.

Driven by our passion and determination to always push the boundaries—part of Hardy’s DNA since 1872—we now offer varying levels of SINTRIX® technology across our rod range, each level brings significant and tangible benefits over traditional carbon fibre construction.

SINTRIX® TECHNOLOGY: IT’S THE SMALL THINGS THAT MAKE A BIG DIFFERENCE.

Microscopic silica spheres evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod.
When I received the first prototype blanks rolled from SINTRIX® material in late 2009 I was shocked. I’ve held and flexed literally thousands of rod blanks over the years, and when I held the 9ft #10 saltwater rod, I was immediately taken aback at the lack of weight for a #10 – it just instantly felt ‘right’.

Our early work on the material with our sister company Hardy Advanced Composites had indicated considerable increases in compressive strength and impact resistance where possible, but even our material engineers were not prepared for the results. Following the first day of testing, we even asked the manufacturer of our compressive strength tester to re-calibrate the machine as the results it had produced were, to quote one of our testers, “nonsense”. There was nothing wrong with the testing machine, the blanks netted out at close to 60% stronger than our calculations suggested they ought to be, and from that point on the entire team focused on the development of what became the Zenith and Proaxis series of rods and the refinement of what was to become SINTRIX® technology.

I could tell you about the testing trips to the Florida Keys fishing for sharks with medium-weight Trout rods, or the actual fist fight that took place on the dockside between two guides over a test rod, but I think some of these quotes from icons and pioneers in the sport tell the impact that SINTRIX® actually made far better than I could.

Howard Croston, Hardy Product Manager and England International.

Howard Croston, Hardy Product Manager and England International.

Magnus Angus, Chief Reviewer, Fly Fishing & Fly Tying Magazine

SINTRIX®: THE SUCCESS STORY.

I could tell you about the testing trips to the Florida Keys fishing for sharks with medium-weight Trout rods, or the actual fist fight that took place on the dockside between two guides over a test rod, but I think some of these quotes from icons and pioneers in the sport tell the impact that SINTRIX® actually made far better than I could.

Howard Croston, Hardy Product Manager and England International.
THE EVOLUTION OF SINTRIX®

Up to 30% increase in compressive strength over traditional carbon fibre.

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre.

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre, with an increase in GPA (stiffness) of up to 15% over SINTRIX® 440.

Since the breakthrough in 2009 we haven’t stopped refining and developing SINTRIX® technology. Today we offer three distinct levels of performance each with their own unique benefits incorporated into our exciting 2017 product line.
FRESHWATER, ALL WATER AND SALTWATER

**Tactical and Extreme**

A number of Hardy rods within our series feature T or E designations.

T designated rods are designed with highly tactical situations in mind where a careful combination of line feel, recovery and carefully calibrated blank stiffness are required to meet specific challenges.

**Freshwater (FWS)**

FWS or “Freshwater series” rods feature selected wood spacers, refined handle designs and carefully selected hardware offering the optimum blend of lightness and durability.

**All water (AWS)**

AWS or “All water series” rods are designed to bridge the gap between light, freshwater and heavy saltwater applications, featuring saltwater safe hardware and fittings, including carbon or aluminium reel seat inserts, larger guides and more powerful actions.

**Saltwater (SWS)**

SWS or “Saltwater series” rods are true hardcore saltwater rods, designed to meet the challenges of the saltwater environment head on. The rods feature heavy duty fixtures and fittings including extra large guides, heavy duty salt safe reel seats and enlarged fighting butts.

Rods designated with an E are typically more at the ‘extreme’ end of the scale where ultra-fast actions and high recovery are specifically required.
Trophy Brown Trout hugging the structure tight to a distant river bank, Rainbows smashing fry on the ripple line in a vast mountain lake, Sea Trout crashing in the void of the darkest summer nights. Adrenaline fuelled moments that require an adrenaline fuelled fly rod. Wraith with SINTRIX® 550 technology generates incredible line speed and unprecedented tip recovery for the longest of casts, yet retains a degree of line control and feel that is almost impossible to translate into words. Load one up and hold on.
Wraith

- SINTRIX® 550 blank construction
- REC® black pearl recoil guides
- Fuji® titanium stripper guides
- Ultra-fast action blank design
- Selected hardwood and triaxial carbon spacers

Supplied in a custom aluminium tube with engraved metal end caps

- Fuji® titanium stripper guides
- Fast action blank design
- Selected hard wood and triaxial carbon spacers
- Supplied in a custom aluminium tube with engraved metal end caps
Whether it’s six feet or sixty six, when your target is to hit a moving shadow dead centre between the eyes with a weightless piece of fluff, accuracy starts to take on a whole new meaning. Zephrus, with SINTRIX® 440 technology, combines the featherweight touch and line feel required to fool a midge feeder under the rod tip, with the power to hit a slab rainbow at full range. Thanks to advanced design, industry leading materials and, above all, a passion for creating the finest high performance fly fishing tools available, all you need do is fire and don’t forget to strike.
Zephrus Double Handed

A massively expanded and improved range of two handed fly rods with SINTRIX® 440 construction. The Zephrus range of two handed rods are the perfect combination of strength, power and finesse covering all two handed rod applications from small freestone streams to mighty spate rivers.

SPEY, SKAGIT OR SCANDI...
YOU BETTER GET USED TO SEEING THE BACKING
The salt is a world of extremes, encompassing the whole spectrum of fly rod challenges in one beautiful but harsh and unrelenting theatre; its inhabitants display all the traits of their home from the paranoid nervousness of the bonefish to the thug-like, raw power of the GT.

Whatever you chase from Permit to Pollack and every species in-between there is absolutely no room in the salt for anything other than an absolute game changer.

Zephyrus SWS with SINTRIX® 440 technology takes the multi award winning, record breaking Proaxis blank design to the next level of saltwater evolution. More feel, more power, more strength, more refinement and even more of a match for the ultimate fly rod challenge—pick one up and change your game for good.

THE SALTWATER GAME CHANGER
## Zephyrus SWS

The Jet series brings refined middle-to-tip actions, low in-hand weight and sharp tip recovery with a smooth and powerful feel.

Fully fitted with high quality custom components and built to exacting Hardy standards, there is a Jet series rod to cover every application from small stream Trout to Salmon and Sea Trout.

All Jet rods feature the industry leading and award winning SINTRIX® technology in our 330 configuration and were designed and developed in our advanced R&D centre in Alnwick, England.
Jet DH and Switch

Jet Double Handed

Featuring the Jet’s refined middle-to-tip action, low in-hand weight and sharp tip recovery with a smooth and powerful feel, in a double handed model. Fully fitted with high quality custom components and built to exacting Hardy standards and feature our award winning SINTRIX® 330 material.

- User-friendly refined high performance rods with SINTRIX® durability
- SINTRIX® 330 blank construction in 4 section configuration
- Refined middle-to-tip action
- Full anodised aluminium fitting with twin down-locking function
- Fuji® guides with hard chrome snake intermediates
- Clear ‘pearl grey’ blank finish with silver highlights and section line up marks
- Supplied with cloth rod bag, and a hard cloth-covered Hardy rod tube

Jet Switch

High banks, tight overhangs, distant seams that require precise line control—all challenges for the ‘short rod’. Enter Jet Switch, a short two-handed configuration that can be fished with both single and two-handed techniques. Super light and responsive, perfect for single-hand manipulation of fly and line during the swing but equipped with a fully functional two handed grip for Spey casting techniques. Ideal for presenting bulky flies and rigs with ease. Jet Switch brings the advantages of SINTRIX® 330 technology into the switch rod category—increased impact resistance, reduced weight and increased compressive strength.

- SINTRIX® 330 blank construction
- Fuji® guides
- Easy loading fast recovery blank design
- Bar stock 6061 aluminium reel seat

SINTRIX® 330 blank construction in 6 section configuration
Medium fast action with high recovery
AmTac Ti guides
Built-in hook keeper
Supplied in a custom aluminium tube with engraved metal end caps

Well travelled. The 6 piece smuggler configuration fits neatly in the compact aluminium tube.
Demon Spin

A range of four section spinning rods harnessing the incredible power and durability of SINTRIX® technology in a modern fast taper design.

- SINTRIX® 330 construction for improved durability
- Full alloy reel seat for long term durability
- Supplied in a hard travel tube
- Fuji Alconite guides

Demon Spin rods feature Fuji Alconite guides and section line up marks.
The Shadow® range delivers the cutting edge in traditional carbon technology in a high performance user-friendly package.

Designed and built around an advanced mandrel design to gain the optimum balance between power, finesse and durability, and with a high modulus carbon core these rods deliver high line speed and the ability to control powerful fish with delicacy and authority.

PERFECT BALANCE OF POWER AND FINESSE
Shadow

The leading edge in traditional carbon rod design
M40 blank construction in 4 section design
Middle-to-tip action, ultra smooth loading and high recovery
Reverse half-wells handles feature a burl wood spacer
Full-wells handles feature an aluminium spacer
High quality hardware throughout
Translucent olive green blank colour
Supplied with matching rod bag and hard fabric covered rod tube

Sirrus Glass rods are a range of super smooth, deep loading fly rods bringing the advantages of SINTRIX® technology to a classic rod range. Perfectly suited to short range presentations on small streams and creeks, the Sirrus range also features incredible impact resistance and an ability to 'self load' at the closest distances.

- SINTRIX® resin impregnated S glass construction
- Super smooth deep loading action
- Classic styling
- High grade fittings and finish

Hardy has been hand-crafting reels in Alnwick for over 120 years, a record that no other tackle manufacturer can ever hope to match. Tradition is baked into our DNA as deeply as the finish on a Perfect reel, but it can only exist in partnership with the constant quest to refine our designs. More than anything else, it is innovation that lies at the heart of the ethos that drives our engineers in a constant search to improve our tackle—without the unique chemistry that binds them and our time-served craftsmen together, a product like the modern Perfect reel could never have been developed.
Wide Spool Perfect

Beautiful classic fly reels, the latest revision in over a century of the Perfect. This model features, a time proven check system, and that classic Perfect sound, hand-crafted in Alnwick, England.

Ever since Forster Hardy was first granted a full patent for the Perfect reel design in 1889, our engineers have been constantly striving for ways to improve on perfection, tweaking and adjusting to bring you what we believe are the best reels in their class to date. After all, if we offered anything less, it would not be a Perfect.

- Made in Alnwick, England
- The all time classic fly reel for the discerning traditional fly angler
- Engineered and hand crafted from bar stock aluminium with a naval brass 1 piece spindle and stainless steel ball bearings
- Standard arbor design and large line capacity
- Time proven, adjustable check system with that traditional ‘Hardy sound’
- Deep anodised for strength and durability; smooth gunmetal grey satin finish
- Easily changed from left to right hand wind
- Supplied in a soft leather, sheepskin lined reel pouch

Launched in 2013 to celebrate the reel’s 110th birthday, this Bouglé is one of the best yet – with its rolling pillar; reversible click check; naval brass bush and spindle; and its hand polished, deep anodised ‘pearl silver’ finish. This Bouglé reel is already one of the classics.

Made by time served Hardy Bros. reel makers here in Alnwick, England, this Bouglé reel comes presented in a beautiful, UK made, soft leather, sheepskin lined reel case.

- Made in Alnwick, England
- A stunning piece of classic design, aesthetics and performance combined
- Engineered, hand crafted and polished in bar stock aluminium finished in pearl silver
- Traditional standard arbor
- Sweet sounding, wide ranging check system
- Naval brass bush and spindle
- Easily changed from left- to right-hand wind
- Spools interchangeable with Bouglé Mk VII, VI, V and IV
- Supplied with Hardy Bros. soft leather, sheepskin lined reel pouch

Marquis LWT

A re-modelled classic Hardy fly reel. The Marquis was a mainstay of the Hardy line up for many years and this new edition features numerous improvements to the original including subtle updating of the classic style with an indented regulator button, increased porting and improved regulation range.

- Made in Alnwick, England
- Bar stock 6061 construction
- Improved range of adjustment
- Modified porting to reduce weight
- Updated yet classic styling
- Indented regulator button

A RE-MODELLED CLASSIC HARDY FLY REEL
EXTREME SITUATIONS REQUIRE AN EXTREME RESPONSE

With all the legendary strength of the original Fortuna series, the new Fortuna XDS offers the same saltwater reliability and brute strength of its predecessor in a new lightweight design.
Fortuna XDS

- Reduced weight design
- 340 degree colour coded drag control
- Captive spool release
- Class leading drag pressure up to 30lb

*14lb of drag on SDS 12000
Whether chasing Tarpon on the Florida flats or seeking out Salmon on the Tweed, the Ultralite SDS is the reel of choice for the serious trophy hunter.

Designed to withstand extremes of temperature, long periods of inactivity followed by searing drag burning runs, and the endless punishment that hunting some of the most challenging fish out there brings, the Ultralite SDS gets the job done time after time after time.

SEALED DRAG FOR THE ULTIMATE SALTWATER PERFORMANCE
Ultralite CA DD

One of the sweetest sounds in fly fishing is the scream of a well-engineered reel smoothly surrendering line to a hot fish as it heads for the horizon... but when that hot fish turns tail and runs right back down the barrel at you, the ability to pick line up and stay in contact becomes paramount to success. The Ultralite CA DD reel series is designed with an ultra large, conical arbor giving incredible line pick up and reducing drag gain on the longest runs, whilst the 360 degree colour coded drag system delivers consistent drag pressure and the ability to always stay one step ahead of the twists and turns of the hottest fish.

ULTRA-SMOOTH PERFORMANCE, ULTRA-FAST PICKUP, ULTRALITE BY DESIGN.

- Available in two versions: Titanium and Black
- Bar stock 6061
- Two tone anodising
- 360 degree colour coded drag
- Captive spool release
- Ultra large arbor
Ultralite MA DD

Trophy fish the world over have one thing in common—they are considered trophies because they do not get caught every day. A weak knot, a sticky drag, not enough backing, there are a dozen things that can go wrong in the fight with the one you don’t want to get away.

The Ultralite MA DD series of reels features a smooth 360 degree colour coded drag for faultless control and easy reference during the fight, and a medium arbor spool designed for anglers who like the comfort of an extra reserve of backing or the extra capacity needed to fit speciality fly line tapers for Pike, Salmon, trophy Trout or even switch style fishing—Ultralite MA DD designed to go the distance.

**CAPACITY FOR WHEN YOU NEED TO GO THE DISTANCE.**

- Bar stock 6061
- Two tone anodising
- 360 degree colour coded drag
- Captive spool release
- Mid arbor design for high line capacity

**Colour coded drag**
Smooth 360 degree colour coded drag for faultless control and easy reference.
The Hardy Ultralite® FW DD (Featherweight Disc Drag) series sets a new standard in ultra lightweight line control. Featuring the incredible low weight of a click check reel but with the super smooth drag performance and low start up inertia of a disc drag reel.

- Minimalistic design to reduce weight
- Bar stock 6061 construction
- Stunning cosmetic design
- Reduced main shaft to eliminate weight
- Super smooth Rulon drag
- Push on / off spool design to reduce weight

FLOATER TO FAST SINKER
AT THE FLICK OF A
SPRING LOADED SWITCH
Ultralite ASR

The ultimate cassette system reel, the new Hardy Ultralite® ASR (Assisted Spool Release) reel features a fast, easy-to-use spool release system that actively frees the spool at the flick of a switch and automatically engages the new spool with a simple push fit. Also new to this range is a lightweight size model specifically designed for the challenges of modern river fishing.

- Bar stock 6061 main construction
- High impact composite spool
- Unique ASR spool system
- Line ID system
- Multi pad, colour-coded 340 degree disc drag
- Heavily ported lightweight design
- Full size range
- Supplied with two additional spare spools and case

Mach Multi Spey

Spey line kit supplied with 3 interchangeable tips: floating, intermediate and sinking (wet 2). The ideal solution for Salmon anglers fishing at different depths. The short dynamic nature of this fly line leads to an ease of casting, as well as efficient presentation of flies, both large and small, even in the most trying conditions. Tick all the boxes with one line.

- Super strong welded loops on both body and tips
- Designed by Ian Gordon to match the latest Hardy Salmon rods
- Line identification marker welded into main body and tips – never mix your lines or tips up again
- Body designed to handle longer/heavier aftermarket tips and additional polyleaders if required

Advanced taper gives effortless high performance casting on a range of rod actions
Seamless transition from low diameter running line to aggressive rear taper for increased line shoot whilst maintaining in flight stability
Supplied with 3 interchangeable tips in tips wallet (floating; intermediate; wet 2)
Running line diameter 0.043”

Lengths and weights of Working Head include tip
Mach Mid Spey

These Salmon lines have been designed for the angler who likes the long range mending and line control that only a full fly line design can deliver. With individual line size head lengths and tapers these lines are an awesome high performance casting line that does not require perfect technique to generate outstanding results. The Mach Spey series of lines have an advanced head design that delivers both high performance results and ease of casting to anglers of all abilities who prefer a full line design. Featuring a refined taper so that polyleaders can also be added with no reduction in performance.
**Mach Trout**

The Mach Series Trout lines feature a heavily-engineered compound taper that offers distance, control and presentation from both short to maximum ranges. The lines are built on a low-memory supple core with a durable, liquid slick, PVC impregnated coating. They also feature welded tip loops. And, of course, they are AFTM size specific to meet the needs of the most demanding single handed anglers.

**Marksman**

Designed specifically to meet the demands of modern angling on both still and running waters. Supplied with high quality braided loops and totally AFTM compliant. We love the soft, subtle, braided core to the lines that means line memory is a thing of the past.

**Premium**

A straightforward, no nonsense range to meet virtually all fly fishing challenges. These lines are durable, long casting and offer easy control. They have next to no memory and give you the near-perfect presentation you need.

8.45 to 15.15 on Friday

Fax

01665 602389

Orders can be sent by fax at any time.

Email

uktradesales@purefishing.com

Orders can be sent by email at any time.
Online Ordering Portal

http://uk.purefishingmerchant.com

Customers can place orders online, check current stock availability and prices through our online portal, B2B.

For access please email bjmcneil@purefishing.com or contact your Account Manager.

ADOBE SCENE 7

Are you signed up to Scene 7?

www.purefishing.com/media-portal

As a Hardy (Pure Fishing) dealer, you can sign up to access Media Portal (also known as Scene 7), which is the Hardy asset library we give access to our dealer network, along with other partners. Once registered with the system you can access it from any computer with internet access. Use Media Portal to find and download product and fishing landscape photography and logos for your project in the correct format. You can also download our catalogues as PDFs.

Individual images can be downloaded in a range of formats using our download wizards, and you can create your own collections or albums and download these as a zip file. Photoshop users can download files using the Scene 7 extension, instructions for which are available upon login under Personal Setup.

We are adding to the collection continuously, so Media Portal is the best place to get up to the minute content to help you sell Hardy products.

For customers requiring access to Media Portal please visit www.purefishing.com/media-portal.
